

Sales Trend Visualization Dashboard Documentation

1. Objective

Create an interactive dashboard to visualize monthly sales data and display summary statistics.

2. Tools and Technologies

Python, Streamlit, Pandas, Matplotlib

3. Features

- Display sales data table
- Monthly sales trend line chart
- Sales summary statistics
- Monthly sales comparison bar chart

4. Dataset

Monthly sales data from January to December.

5. Output

The dashboard shows sales trends, comparisons, total sales, average sales, highest sales, and lowest sales.
